Aged Skin

✓ PDRN-powered rejuvenation that restores radiance, boosts hydration, and supports skin healing.

✓ PDRN, GHK-Cu, and antioxidants work in synergy to support tissue repair, collagen production, and skin resilience.

✓ Gentle, non-irritating formula backed by clinical research—formulated for professional treatments.

All Beauty Global PDRN - KEY INGREDIENTS

Our formula combines clinically studied, premium-grade ingredients thoughtfully selected to restore, repair, and rejuvenate the skin from within. Each component has been chosen for its unique synergy—working together to promote cellular regeneration, deep hydration, brightening, and visible firming. The result is a high-performance solution that elevates treatment outcomes, supports skin healing, and delivers radiant, youthful results your clients will love.

SALMON DNA (PDRN)

A powerful tissue-regenerating compound derived from the DNA of salmon, known for its remarkable compatibility with human skin. PDRN works at the cellular level to repair damaged tissue, stimulate collagen synthesis, and restore elasticity—making it ideal for aging, compromised, or post-procedure skin.

GHK-CU (COPPER TRIPEPTIDE-1)

A naturally occurring peptide known for its wound-healing, anti-inflammatory, and regenerative properties. GHK-Cu supports healthy skin remodeling, improves firmness and elasticity, and reduces the appearance of scars and fine lines.

SODIUM HYALURONATE

A lower molecular weight form of hyaluronic acid that penetrates deeply into the skin to deliver intense, long-lasting hydration. It reinforces the skin barrier, enhances moisture retention, and improves suppleness without clogging pores.

PANTHENOL (PRO-VITAMIN B5)

A skin-conditioning agent that supports moisture balance and reinforces the skin's natural barrier. It soothes, softens, and protects, reducing sensitivity and irritation while enhancing post-treatment recovery.

GLUTATHIONE

A master antioxidant that brightens and evens skin tone, reduces pigmentation, and protects against oxidative stress. In synergy with PDRN, it enhances skin clarity, diminishes fine lines, and calms inflammation, resulting in a healthy, radiant glow.

ANEMARRHENA ASPHODELOIDES ROOT EXTRACT

A unique botanical extract that helps restore youthful volume to the skin. Known for its lifting and firming effect, it improves facial contour, smooths wrinkles, and supports natural collagen and lipid production for a plumper, revitalized appearance.

Treatment Highlights

- ✓ Non-surgical
- ✓ Stimulates collagen production
- ✓ Little to no downtime
- ✓ Gradual & natural-looking results
- ✓ Slows down signs of ageing
- ✓ Brightens Appearance

The duration of this treatment is 45 minutes.

This includes the duration for topical numbing cream to take effect.

The treatment is painless and has zero downtime.

There is no downtime, so you can resume your activities right after the treatment.

The effect is noticeable almost immediately, within 3-4 days you will have a radiant glow.

Q&A

Q.1 To what customers is ABG PDRN recommended?

People who want skin regeneration and repair at a cellular level.

Q.2 What are the precautions after the procedure?

Don't consume alcohol after procedure.

Pregnant women avoid procedure.

Q.3 How many times of procedure is needed?

Initial Protocol: 3 to 4 treatments spaced 2 to 4 weeks apart, depending on skin condition and goals.

Maintenance: 1 treatment every 3 to 6 months to maintain results and skin health.

Why Multiple Sessions? PDRN works by stimulating your skin's natural healing process and cellular renewal. This effect builds over time, making consistent treatments key to achieving long-term rejuvenation.

Q.4 How long does the effect last?

Results typically last 4 to 6 months after completing the initial treatment series.

- Most clients notice improved hydration, tone, and texture within 7–10 days of the first session.
- Collagen stimulation and skin repair continue to build over the following weeks.
- For long-term benefits, maintenance treatments every 3–6 months are recommended.

Q.5 How is the treatment performed?

- Microneedling:
- A gentle pass with a microneedling device opens the skin.
- First pass with an HA booster for glide
- PDRN applied topically to open skin
- Second shallow pass at 0.5–0.75 mm depth to enhance absorption
- Optionally followed by red light therapy and a Cell Repair Skin Booster mask
- Other compatible technologies:
- PDRN can be used with jet plasma, cold plasma (Dr. Platon), galvanic current, and radiofrequency to enhance delivery and results.

Protocols

Microneedling

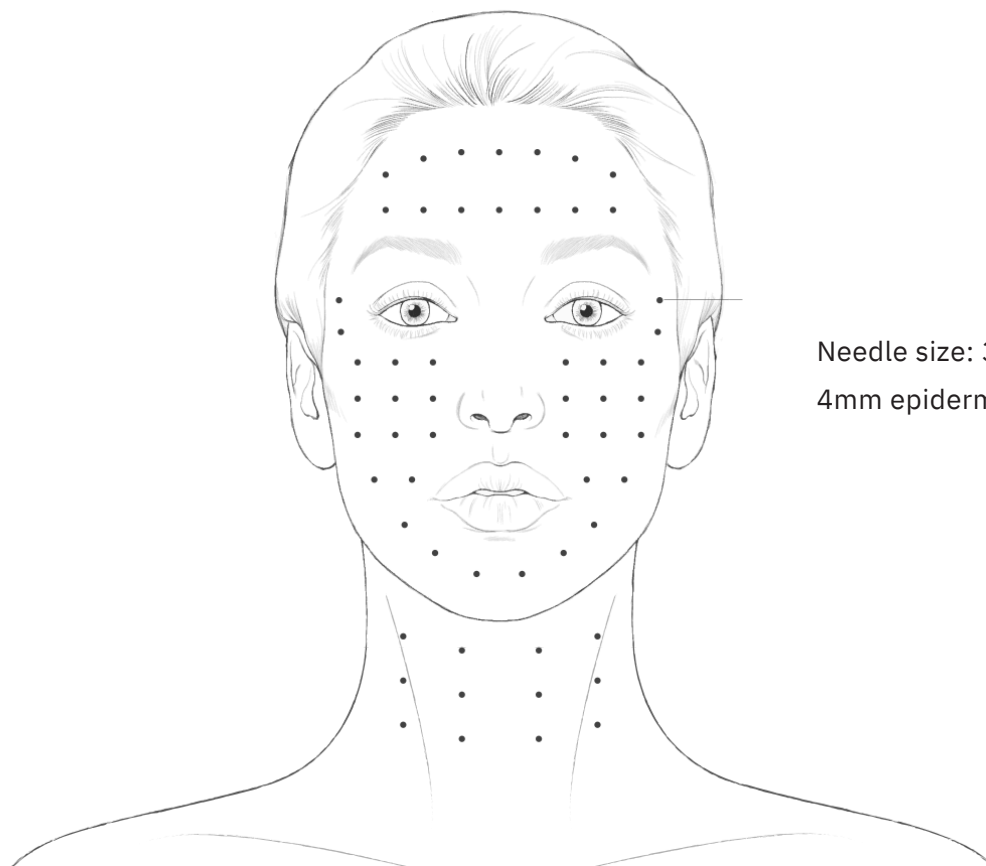

Via Subcutaneous Injection - Off-Label

After Laser Treatment

Derma Roller

Jet Plasma/Cold Plasma

Inopheresis

Needle size: 32g to 34g

4mm epidermis or dermis

Suggested Use

Mesotherapy or MicronJet Microneedle-based intradermal injections (off-label):

Injection depth: Superficial – Subcutaneous

Spread: Roughly the size of a pea or smaller

This method allows for precise placement and enhanced regeneration

Other compatible technologies:

PDRN can be used with Microneedling, jet plasma, cold plasma (Dr. Platon), galvanic current, radiofrequency Microneedling, radiofrequency, post lasers to enhance delivery and results.
